Summary

With extensive experience managing multi-phase research projects, I ask meaningful questions and deliver actionable answers. I'm an analytical researcher experienced in collecting, analyzing, and visualizing data in R and Python to generate clear insights for practical decision-making. Skilled in communicating with audiences of varied seniority and expertise: from senior scientists to junior researchers. Looking to help organizations answer questions they have about human behaviour with data-driven methods.

Relevant Experience

Data Analyst — *July 2026 to Present*

U+ Education, Markham, ON

- Supporting event and program evaluation through data cleaning, analysis, and visualization.
- Contributing to reporting on program outcomes to inform data-driven decision-making.

Graduate Student Researcher — *Sept. 2025 to Present*

University of Waterloo, Waterloo, ON

- Collect, analyze, and interpret behavioural data to uncover insights about human decision-making.
- Design and program data pipelines from collection to dissemination.
- Synthesize complex statistical analyses for diverse audiences.

Undergraduate Researcher — *Sept. 2022 to Sept. 2025*

Wilfrid Laurier University, Waterloo, ON

- Led full-cycle data collection and analysis projects using varied tools (physiological devices, surveys).
- Cleaned and analyzed data (100+ hours) to identify behavioural findings and generate takeaways.
- Published first-author findings from a dataset including 3,000+ participants (*Hearing Research*, 2026).

Technical Skills

- Data Analysis + Visualization: R (`tidyverse`, `ggplot2`, `lme4`), Python (`pandas`, `numpy`, `matplotlib`).
- Research Methods: Proficient in survey design, inferential statistics, statistical modelling.
- Software: Excel, PowerPoint, Word.

Selected Achievements

- NSERC Canada Graduate Research Scholarship - Master's (\$27,000, nationally competitive).
- Ontario Graduate Scholarship (\$15,000, provincially competitive, declined in favour of NSERC).
- Symposium presentation at a national psychological conference on factors that bias human decision-making.
- Presented eight first-author posters on human attention, perception, and decision-making.

Education

University of Waterloo, Waterloo, ON

M.A. in Cognitive Psychology — Expected 2027

Wilfrid Laurier University, Waterloo, ON

Honours B.A. in Psychology (Research Specialization), High Distinction — 2021 to 2025
